PROJECT EXPERIENCE HIGHLIGHTS

1.Project Title: Amazon Clone Using HTML, CSS and Java Script

Project Description:

Developed a Amazon clone using HTML, CSS, and JavaScript, replicating key features such as product listings, search functionality, user authentication, cart management, and checkout process.

2. Project Title: Real Estate Price Prediction System

Project Description:

Utilizes a machine learning model to predict real estate prices, integrated with a Flask backend for handling predictions; frontend developed with HTML, CSS, and JavaScript to offer a user-friendly interface for property exploration and prediction. 

3. Project Title: Student Dashboard

Project Description:

Employs HTML, CSS, and JavaScript to craft an interactive student dashboard showcasing academic data, schedules, and performance metrics; facilitating seamless navigation and engagement for students.
